

WHAT IS CLAIMED IS:

- Sub  
C1
- 5
1. In a spar structure for offshore hydrocarbon recovery operations,  
a vertically oriented elongated floating hull with a buoyant upper section;  
a ballasted lower section;  
a truss member <sup>separated</sup> ~~separated~~ the floating hull from the lower ballasted section;  
an anchoring system connecting the hull to the ocean floor; and  
a vertically oriented fairing shaped profile section presented on the hull.

- 10 2. A spar structure in accordance with Claim 1 wherein the fairing shaped profile section is formed by an outer wall of the hull.

- 0897031302680
3. A spar structure in accordance with Claim 1 wherein the ~~fairing shaped profile section~~ comprises a vertically extending fairing <sup>rotatably</sup> ~~rotatably~~ mounted about the floating hull.
